Art Unit: 2157

1. This action is responsive to the amendment filed on June 20, 2004. Claims 5-6 were amended. Claims 1-4, and 7 were canceled. Claims 8-43 were newly added. Claims 5-6, and 8-43 are pending.

*Election/Restriction*

2. Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 5-6 are drawn to a system for computer-to-computer data framing, classified in class 709, subclass 236.
- II. Claims 8-11, and 17-18 are drawn to a method and system for computer-to-computer session/connection establishing, classified in class 709, subclass 227.
- III. Claims 12-16, and 41-43 are drawn to a system for data flow compensating, classified in class 709, subclass 234.
- IV. Claims 19-40 are drawn to a method for star or tree computer networking, classified in class 709, subclass 252.

3. Newly submitted claims 8-43 are directed to an invention that is independent or distinct from the invention originally claimed for the following reasons:

Inventions I, II, III, and IV are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention I has separate utility such as converting discrete input information represented by a wireless data frame to an Internet protocol base protocol packet format. See MPEP § 806.05(d). Inventions II-IV have separate utility such computer-to-computer session/connection establishing, data flow compensating, and tree computer networking.

Since applicant has received an action on the merits for the originally presented invention, this invention has been constructively elected by original presentation for

prosecution on the merits of claims 5-6. Accordingly, claims 8-43 are withdrawn from consideration as being directed to a non-elected invention. See 37 CAR 1.142(b) and MPEP § 821.03.

4. Claims 5-6 are allowed.
5. The applicant is requested to cancel claims 8-43 in response to this office action.
6. The following is an examiner's statement of reasons for allowance:

The prior art of record does not teach neither singly not in combination the claimed limitation of "converting discrete input information represented by a wireless data frame to an Internet protocol base protocol packet format and routing the packets through a dynamically created wireless routing network" as in claims 5-6.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

7. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CAR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CAR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
